Project Highlights

Services Offered - Consulting, System Design, Set Design, LED Wall, Broadcast Installation, LED Set Lighting, Green Screen, AV Installation

A New Studio

Ocean City High School was ready for a studio that met the demands of a full production space. OCHS produces award-winning Daytime Emmy's year after year and needed a new studio look to complement their status. Horizon AVL was selected to design a state of the art broadcast suite, a news broadcast studio, a side set, and green screen.

Ocean City High School has employed industry professionals from Disney, WB, and ABC. The collaboration with these professionals required production standards that met and exceeded industry standards across the board.

Audiovisual Components

Horizon AVL and Ocean City High School worked together to design a complete turnkey studio solution that would give students the opportunity to work with broadcast industry equipment. A new set design introduced a fresh look with a custom curved LED wall. A backdrop provides a dynamic look for the show which changes the atmosphere into modern and warm. New HD cameras complete the redesign of their control room to HD and offers Ocean City High School the ability to produce high quality content.
